We can end AIDS as a Public Health threat with Communities Leading the Way!

Communities must be at the centre of the **formulation**, **budgeting**, **implementation**, **monitoring**, and **evaluation** of all plans, policies, and programmes that affect us.

Communities must be **fully** and **sustainably funded** and the people implementing community-led programmes should be **properly remunerated.**

 Remove barriers to communities' leadership roles by **ensuring civil society space** and **protecting** the **human rights** of all the people.
